

## AUTO PUNCH POLISHER

Auto Punch Polisher helps improve the surface finish of punches, which leads to improved tablet finish, minimises sticking and prevents corrosion.

During tablet production, punches and dies lose their original finish due to abrasion and powder sticking. At present these are normally cleaned by manual polishing, which is a time-consuming process and the finish depends on operators' skill.

The Auto Punch Polisher minimises dependence on operator skill and increases productivity by 20 times. The machine is fitted with a PLC that allows the user to program the complete cycle.

## Standard Accessories

- Punch holders: 3 nos each for B & D tooling
- Granules: 30Kg
- Paste: 3Kg

## Optional Accessories

- Die holders: For BB, B & D tooling

## Specifications

- Capacity : 54 punches of B or D tooling
- Cycle Time : Approximately 20 minutes (C.W & A.C.W) for re-polishing
- Main Motor : 2 HP controlled by an A.C. drive
- Electrical Supply : Three phase, 440 volts
- Dimensions of Machine [Lx W x H] : 97 x 77 x 211cm
- Weight [Approx] : Net - 300kgs
